Table of Contents

Abstract:	3
Introduction and objective of the research:.....	6
Methodology:	7
Terminologies and definitions:	8
I-General Preview:	9
I-1- Climate data of the lagoon:.....	9
I-2-Geographical data of the lagoon:.....	10
I-3-Lagoon Formation History.....	11
II-Landscape analysis	12
II-1-Diversity in Landscape character:	12
.II-2-Urban landscape character	14
II-3-Agricultural landscape character	15
II-4-Forest and green landscape unit character:	16
III-Ecological analysis	17
III-1-Migratory route of water birds through the Mediterranean.....	17
III-2-Dynamics of vegetation and space on the banks of the Essijoumi lagoon.....	19
IV- Urban analysis.....	20
IV-1- General context	20
IV-2-Forms of human occupation of the banks of the Essijoumi lagoon:.....	21
V-Impact of urban development on the lagoon: An urbanization generating vulnerabilities:.....	24
V-1- Fragmentation of Habitats:.....	24
V-2-threatened birds	25
V-3-Water Quality Degradation.....	26
V-4- Changes in hydrographic dynamics: flooding risk.....	28
V-5-Consolidation of banks and impacts on the ecosystem of the lagoon	30
V-6- Essijoumi lagoon: a fragile and vulnerable ecosystem	31
V-7-Synthesis:.....	32
VI- Conceptual Approach & Design Development.....	33
VI-1-The proposed solutions: Tunisian authority intervention plans.....	33
VI-2-Conceptual approach: urban level.....	35

VI-3-Site analysis:.....	36
VI-4-Design strategies	37
VI-5- Functions, structure & plantation dispatching	39
VI-6-Bubble Diagram	40
VI-7- Master plan.....	42
VI-8- Main section	43
VI-9- Pathway typology	44
VI-10- Pavement types	46
VI-11- Plantation character and spices.....	47
VI-12- Ecological area	50
VI-13- Educational area	53
VI-14- Recreational area.....	54
VI-15- Water management typology.....	56
VI-16-Elevated pathway detail	58
VI-17-Conclusion	60
Table of illustrations.....	<u>62</u>
Bibliography and literature.....	64

LANDSCAPE ANALYSIS

The landscape in the northern part of the lagoon is characterized by a high density of urban development, with a mix of residential and commercial areas. The landscape is characterized by a high density of urban development, with a mix of residential and commercial areas. The landscape is characterized by a high density of urban development, with a mix of residential and commercial areas.

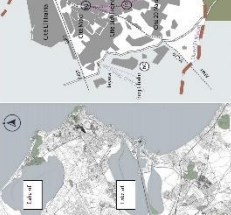

ECOLOGICAL ANALYSIS

The ecological analysis identifies the various habitats and species within the lagoon. It highlights the importance of the lagoon as a habitat for various bird species, including the Great Egret, Little Egret, and Ciconia. The analysis also identifies the various habitats and species within the lagoon.

URBAN ANALYSIS

The urban analysis identifies the various urban areas and their impact on the lagoon. It highlights the importance of the lagoon as a habitat for various bird species, including the Great Egret, Little Egret, and Ciconia. The analysis also identifies the various habitats and species within the lagoon.

DESIGN STRATEGIES & APPROACHES

The design strategies and approaches are based on the ecological and urban analysis. They focus on enhancing the lagoon's ecological value and integrating it with the surrounding urban environment. The design strategies and approaches are based on the ecological and urban analysis.

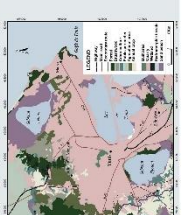

FROM ABSTRACT CONCEPT TO THE BUBBLE DIAGRAM

The bubble diagram illustrates the spatial organization of the lagoon development. It shows the various functional areas and their relationships, including the urban area, the lagoon, and the surrounding environment. The bubble diagram illustrates the spatial organization of the lagoon development.

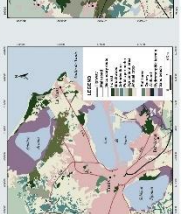

CONCEPTUAL INSPIRATION

The conceptual inspiration is drawn from various sources, including the lagoon's natural environment and the surrounding urban context. It aims to create a development that is both ecologically sound and aesthetically pleasing. The conceptual inspiration is drawn from various sources.

FLAMINGOS NESTING ISLAND

The flamingo nesting island is a key feature of the lagoon development. It provides a safe and suitable habitat for flamingos to breed and raise their young. The flamingo nesting island is a key feature of the lagoon development.

IMPACT OF URBAN DEV

The impact of urban development on the lagoon is a significant concern. It can lead to the degradation of the lagoon's ecological value and the loss of its natural habitats. The impact of urban development on the lagoon is a significant concern.

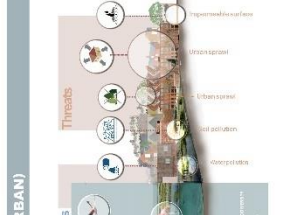

CONCLUSION

The conclusion of the study is that the lagoon development should be based on a holistic approach that considers the ecological, urban, and social aspects. It should aim to enhance the lagoon's ecological value and integrate it with the surrounding urban environment. The conclusion of the study is that the lagoon development should be based on a holistic approach.

SUMMARY OF SITE ANALYSIS (LANDSCAPE, ECOLOGICAL, URBAN)

The summary of the site analysis provides a comprehensive overview of the lagoon's landscape, ecological, and urban characteristics. It highlights the key findings and the design strategies and approaches. The summary of the site analysis provides a comprehensive overview of the lagoon's landscape, ecological, and urban characteristics.

NORMAL HYDRAULIC OPERATION OF LAGOON

The normal hydraulic operation of the lagoon is characterized by a high degree of variability in water levels and flow rates. It is influenced by various factors, including the lagoon's morphology and the surrounding urban environment. The normal hydraulic operation of the lagoon is characterized by a high degree of variability in water levels and flow rates.

CURRENT HYDRAULIC OPERATION OF LAGOON

The current hydraulic operation of the lagoon is characterized by a high degree of variability in water levels and flow rates. It is influenced by various factors, including the lagoon's morphology and the surrounding urban environment. The current hydraulic operation of the lagoon is characterized by a high degree of variability in water levels and flow rates.

URBAN APPROACH

The urban approach focuses on integrating the lagoon development with the surrounding urban environment. It aims to create a development that is both ecologically sound and aesthetically pleasing. The urban approach focuses on integrating the lagoon development with the surrounding urban environment.

DESIGN STRATEGIES & APPROACHES

The design strategies and approaches are based on the ecological and urban analysis. They focus on enhancing the lagoon's ecological value and integrating it with the surrounding urban environment. The design strategies and approaches are based on the ecological and urban analysis.

FROM ABSTRACT CONCEPT TO THE BUBBLE DIAGRAM

The bubble diagram illustrates the spatial organization of the lagoon development. It shows the various functional areas and their relationships, including the urban area, the lagoon, and the surrounding environment. The bubble diagram illustrates the spatial organization of the lagoon development.

CONCEPTUAL INSPIRATION

The conceptual inspiration is drawn from various sources, including the lagoon's natural environment and the surrounding urban context. It aims to create a development that is both ecologically sound and aesthetically pleasing. The conceptual inspiration is drawn from various sources.

CONCEPTUAL INSPIRATION

The conceptual inspiration is drawn from various sources, including the lagoon's natural environment and the surrounding urban context. It aims to create a development that is both ecologically sound and aesthetically pleasing. The conceptual inspiration is drawn from various sources.

FLAMINGOS NESTING ISLAND

The flamingo nesting island is a key feature of the lagoon development. It provides a safe and suitable habitat for flamingos to breed and raise their young. The flamingo nesting island is a key feature of the lagoon development.

DECLARATION

Regarding the thesiswork prepared by NARMINE MILI (student Neptun code: _YNG9B4) as a consultant, I declare that I have reviewed the final thesis/thesis/dissertation/portfolio¹ and that I have informed the student of the requirements, legal and ethical rules for the correct handling of literary sources.

I recommend / do not recommend² the final thesis / dissertation / portfolio to be defended in the final examination.

The thesis contains a state or official secret: yes no^{*3}

Date: 2023. November 11th

internal thesis advisor

¹ The other types should be deleted while retaining the corresponding thesis type.

² The appropriate one should be underlined.

³ The appropriate one should be underlined.

DECLARATION

the public access and authenticity of the thesis/dissertation/portfolio¹

Student's name: Narmine Mili
Student's Neptun code: YNG9B4
Title of thesis: Site development and enhancement of Sijoumi Lagoon–Tunis
Year of publication: 2023
Name of the consultant's institute: Hungarian University of Agriculture and Life Sciences
Name of consultant's department: Landscape Architecture, Urban Planning And Garden Art

I declare that the final thesis/thesis/dissertation/portfolio submitted by me is an individual, original work of my own intellectual creation. I have clearly indicated the parts of my thesis or dissertation which I have taken from other authors' work and have included them in the bibliography.

If the above statement is untrue, I understand that I will be disqualified from the final examination by the final examination board and that I will have to take the final examination after writing a new thesis.

I do not allow editing of the submitted thesis, but I allow the viewing and printing, which is a PDF document.

I acknowledge that the use and exploitation of my thesis as an intellectual work is governed by the intellectual property management regulations of the Hungarian University of Agricultural and Life Sciences.

I acknowledge that the electronic version of my thesis will be uploaded to the library repository of the Hungarian University of Agricultural and Life Sciences. I acknowledge that the defended and

- not confidential thesis after the defence
- confidential thesis 5 years after the submission

will be available publicly and can be searched in the repository system of the University.
